- Fireplace
- Roof access

“Our proposal for construction is based on the following principles: A privileged association with the valley; the houses hang over the valley, detached from the ground. Laying out the houses in relation to the thoroughfare, guaranteeing their privacy and a certain degree of “invisibility”. Allowing the interior areas of the house the possibility of extension into the exterior. Constructing exterior spaces that relate closely to the landscape, but maintain a high level of privacy.”

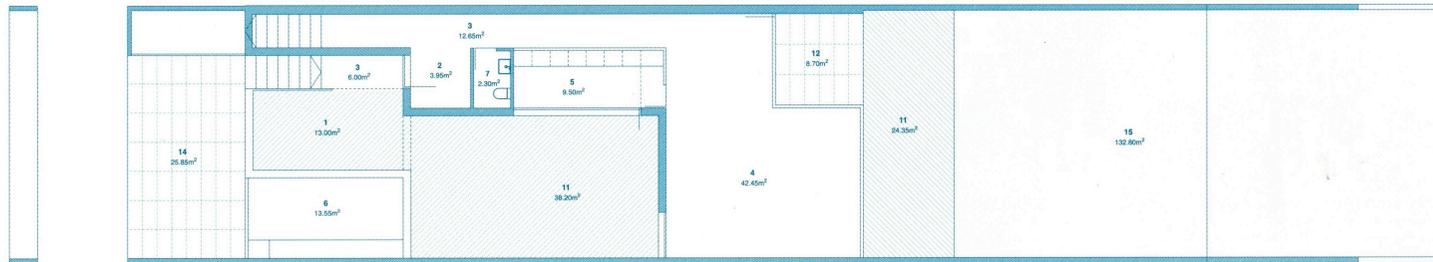

Inês Lobo
Architect
